

EvapoRite Systems
INCORPORATED

Water
Remediation

PATENTED - CUSTOM DESIGNED - HIGHLY EFFICIENT - ANY SIZE LOCATION

EVAPORATION SYSTEMS

OIL & GAS - MINING - POWER PLANTS - COMMERCIAL PITS

Long-term elimination costs around a penny per gallon (~\$0.51/bbl)

- Systems designed to achieve maximum elimination for the lowest operational cost
- Patented technology is integrated into every design, from reserve pits to commercial ponds
- Proven environmental stewardship without sacrificing operational efficiency

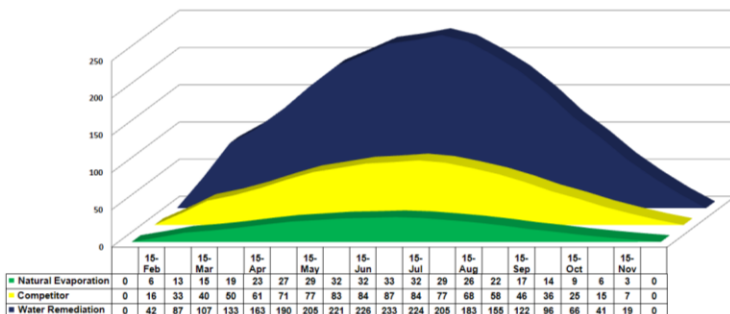

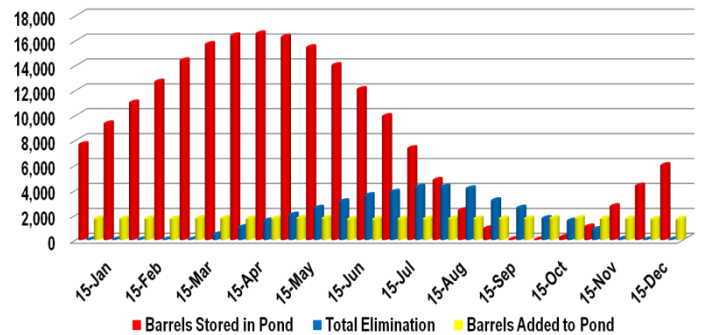

Our costs and capabilities are based on measurable results, not hollow promises

- We don't hype performance or guess at results; you'll know exactly what to expect
- We've been measuring performance for years
- Use our knowledge of components, systems, and services to support informed decisions

Get the facts before you buy, call for a consultation and/or projection

- Detailed analysis of competing options
- Projections tailored to specific location
 - Modeling based on detailed empirical data collected from years of evaporation activities
 - Integrates climate data, environmental factors, and site operational activities
- Multi-year projections support long-term O&M estimates, production schedules
