

Floating Evaporation Systems, Are You Infringing?

On September 3, 2009, the U.S. Patent & Trademark Office (USPTO) notified our company that our patent for a floating evaporation system had been approved.

Claims approved include:

- A pump on the bank next to the pond
- A manifold to separate water into multiple streams
- Pontoon system for floating evaporation process over surface of pond
- a reservoir to receive water and feed it into one or more risers
- at least one nozzle attached to each riser to convert wastewater into an evaporable spray.
- the use of hollow cone nozzles

Nozzles?

Pontoons?

Manifolds?

Note: We have other Patents Pending
